

I agree with the petitioner Puerto Rico Amateur Radio League, that the code should be eliminated from the Technician, giving all current Technician class licensees Tech Plus privileges, dropping the code for the General class, and maintaining the 5WPM code for the Extra Class. This appears to be the best way to treat the code requirements. Additional code speed for the Extra class as petition in other petitions is self-defeating. It is difficult now to get folks to take their code exams, when they really are not interested in code at all.
